

HR Automation & Compensation Framework

1. Pay Philosophy & Positioning

Target: P50 for B performers, P65 for A performers, P75 for S performers.

Annual salary review every April; mid-year adjustments for market correction only.

Total comp = Base + Bonus + Stock Options (P6+) + Benefits.

2. Automated Compensation Actions

Action: Generate Salary Adjustment — Trigger: performance review completed.

S grade: +15% base; Action creates approval workflow → Leader → VP → HR VP.

A grade: +10% base; Action creates approval workflow → Leader → VP.

C grade: 0% raise; Action creates coaching tracking task for HR BP.

Action: Market Correction Trigger — IF salary < market P25 THEN immediate adjustment regardless of grade.

Action: Bonus Pool Calculation — Triggered annually in March; system calculates pool = 15% of payroll.

IF dept KPI < 80% THEN bonus pool for dept reduced by 20% automatically.

3. Stock Options (P6+)

Grant Schedule: P6=50k, P7=150k, P8=400k options.

Vesting: 1-year cliff, then 4-year monthly vesting.

Action: Grant Stock Options — Trigger: promotion to P6+ confirmed.

Action: Forfeit Unvested Options — Trigger: voluntary resignation before 2-year mark.

Action: Accelerate Vesting — Trigger: involuntary termination without cause (company protection).

4. Offboarding Financial Actions

Action: Calculate Severance (N+1) — Trigger: involuntary termination after PIP failure.

Action: Stop Non-Compete Compensation — Trigger: ex-employee joins competitor.

Action: Final Payroll Processing — Trigger: last working day confirmed; includes unused leave payout.

Action: Stop Social Insurance — Trigger: next 1st of month after last working day.
